DETAILED ACTION

Based on the IDS filed on March 21, 2007, the allowability is withdrawn, and the claims are rejected based on the references submitted on the IDS.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11, 12, 14, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Pirrung et al. (Pirrung) (JP 11315095).

Pirrung discloses an apparatus and method comprising a radiation system (ref. 124, para 0084-0091, Fig. 8), a patterning structure (128), a substrate table to hold a substrate (102, 106), a projection system (120), and irradiating a fluid channel, where fluid interacts with to effect a process which includes a chemical reaction with the substrate surface (abstract), provided adjacent to a substrate with an irradiation light through a pattern formation means, such as a light valve, and the projecting and processing are carried out simultaneously (para 0084-0091, Fig. 8, 11 and 12).

Allowable Subject Matter

Claims 1-10 are allowed.

Claims 13, 15, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2851

None of the prior art of record teaches or discloses an apparatus and method comprising the fluid processing configured so that different area of the substrate may be subject to different fluid processes simultaneously.
